PROFESSIONAL SUMMARY

Master of Information Technology and Systems graduate recognised on the **Roll of Excellence (2025)**, with hands-on experience improving real-world systems across software, data, and security environments. Delivered measurable outcomes, including reducing user navigation time by ~20%. Skilled in analysing systems, resolving issues, and contributing to applications within agile teams. Adaptable and quick to learn, with a focus on delivering reliable, user-focused solutions.

EDUCATION

University of
Tasmania

2023–2025

Master of Information Technology and Systems

- Specialised in Cybersecurity, Artificial Intelligence, and Data Analysis, focusing on securing systems and deriving insights from data
- Completed practical work involving IoT environments, API integration, and backend data handling across 3–4 projects
- Applied Agile and project management practices to deliver structured, team-based solutions

University of
Greenwich

2015–2019

Bachelor of Business Information Technology

- Developed understanding of how IT supports business operations, including systems analysis and process improvement
- Gained experience in database management and data-driven decision support through applied coursework

WORK EXPERIENCE

Active Work
Laboratory, UTAS

Feb 2025 – Jun 2025

Software Developer Intern

- Improved usability of a digital health platform, reducing navigation time by ~20%
- Identified and resolved usability gaps, enhancing accessibility and user interaction
- Contributed to agile development cycles, including code reviews and iterative updates
- Refactored system components, improving maintainability and reducing future development effort

Business
Automation Ltd.,
Bangladesh

2020–2022

Software Developer

- Delivered features for enterprise and government applications in production environments
- Optimised database queries and performance, improving system responsiveness
- Diagnosed and resolved system issues, strengthening reliability and stability
- Collaborated with QA teams to test, debug, and enhance overall system performance

ADDITIONAL EXPERIENCE

Coles Supermarket,
Hobart

2023– Present

Customer Service Team Member

- Handled high-volume customer interactions (~100+ per shift) in a fast-paced environment while maintaining service quality
- Resolved customer issues efficiently, balancing service expectations with store policies
- Adapted quickly to changing priorities, demonstrating reliability in a dynamic retail environment

SKILLS

- **Programming:** Python, JavaScript, PHP
- **Data & AI:** Data analysis, machine learning concepts
- **Cybersecurity:** Secure coding, data protection, risk awareness
- **Databases:** MySQL, MongoDB
- **Networking & Systems:** TCP/IP, DNS, system administration
- **IT Support:** Troubleshooting, debugging, incident resolution
- **Technologies:** REST APIs, Git, Linux, Windows

PROJECTS

Portfolio Website | www.mdr-tanvir.dev

- Developed a personal portfolio website to showcase projects and technical capabilities
- Implemented responsive design and structured navigation to enhance user experience and accessibility
- Integrated backend functionality to support dynamic content and efficient data handling

ExerTime Platform (UTAS Placement) | www.exertime.com

- Contributed to the development of a digital health platform used in a research environment
- Improved system usability, reducing navigation time by ~20% through targeted interface enhancements
- Identified and resolved usability issues, enhancing accessibility and overall user interaction
- Collaborated within agile development cycles, supporting testing, feedback, and iterative improvements

ADDITIONAL INFORMATION

- Full working rights in Australia (RWVP eligible)
- Full driver's licence
- Open to graduate roles in IT support, systems, and technology functions
- Open to relocation across Tasmania
